PROFESSIONAL SUMMARY

Software Engineer with hands-on, end-to-end experience designing, building, and deploying 5+ full-stack web applications across fintech, agri-tech, and operations management domains. Skilled in Object-Oriented Programming, REST API development, database design, and cloud deployment. Secured 2nd place in a state-level cybersecurity hackathon for an AI-powered deepfake detection system. Seeking a Software Development Engineer (SDE) role to apply strong problem-solving skills and real-world full-stack engineering experience.

EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science

September 2023 - Present

K.S. Rangasamy College of Technology | CGPA: 8.19 / 10

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript

Frontend Development: React.js, React Native

Backend Development: Node.js, Express.js, Flask

Databases: MongoDB, Supabase, SQL

AI / Machine Learning: Machine Learning, LangChain, OpenAI API, Roboflow

Cloud & Tools: Git, GitHub, REST APIs, Cloudflare, VPS Hosting, API Integration, Authentication, Deployment

Soft Skills: Problem Solving, Team Collaboration, Communication

WORK EXPERIENCE

Web Developer Intern, Gradix Technologies

March 2026 - June 2026

- Built responsive React.js interfaces for 3+ internal applications, improving UI consistency across the product
- Developed and documented REST APIs using Express.js and Node.js.
- Optimized frontend rendering and backend database query performance, cutting average page load time by 25%
- Collaborated with a 4-member Agile development team using Git, participating in sprint planning, code reviews, and daily standups

PROJECTS

DAKSHAA T26 - Full-Stack Event Management Portal <https://dakshaa.ksrct.ac.in/> January 2026 - February 2026

React.js, Supabase, Cloudflare, VPS Hosting, REST API

- Developed a full-stack event management portal for a national symposium supporting 3,000+ attendees
- Integrated Supabase for database management and authentication, and embedded a secure college payment gateway for online registration and transactions
- Deployed frontend on Cloudflare and backend on a VPS server for reliable, low-latency access

Time2Order - Preorder Management System <https://time2orders.com/> August 2025 - November 2025

Python Flask, SQL, Cashfree Payment API, REST API, React Native

- Architected an app-based preorder platform that reduced customer wait times by approximately 40% and streamlined peak-hour crowd flow for 10+ local shops
- Implemented backend logic in Python and SQL and integrated the Cashfree Payment API to handle secure digital transactions

TrueSight AI - Deepfake Detection System github.com/Vikasthangavel/true_sight_AI.git November 2025 - December 2025

Python, Flask, Roboflow, Machine Learning, REST API

- Engineered a multimodal deepfake detection system analyzing video and audio using Roboflow machine learning models and a Flask REST API
- Generated structured forensic reports for 10+ evidence types and designed an investigation-centric workflow aligned with cybercrime operational needs

Time2Farm - Farmer AI Assistant <https://time2farm.pages.dev/> April 2025 - July 2025

React.js, Gemini API, JavaScript

- Built an agri-tech financial management platform enabling farmers to track section-wise income, expenses, and profit across multiple farm divisions
- Integrated the Gemini API to deliver AI-driven financial insights, reducing manual bookkeeping effort by 70%

ACHIEVEMENTS

- Secured 2nd Place in the Namakkal Police Cybersecurity Hackathon 2025 (state-level) for developing an AI-based cybercrime detection solution
