SUMMARY

Entry-level Software Engineer with hands-on experience in Python, SQL, REST APIs, and enterprise-style web applications. Experienced in building ERP-like business platforms, data dashboards, and backend systems that improve operational efficiency. Strong interest in enterprise software, SAP ecosystems, business process automation, and data-driven decision systems. Passionate about solving real-world business problems using scalable digital solutions.

WORK EXPERIENCE

AIML VIRUTAL INTERSHIP

- April June 2025 10 weeks) Successfully completed a 10-week virtual internship focused on Artificial Intelligence and Machine Learning, gaining hands-on experience in model development, data preprocessing, and algorithm optimization

EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science

Sep 2023 - Jun 2027

- K.S.Rangasamy College of Technology CGPA: 8.2

PROJECTS

- **Time2Due – Operations Management Platform (ERP-style system):** Designed and developed a web platform for cable operators to manage employees, offline payments, and operational reports through a secure and mobile-friendly dashboard. The system supports business workflow management and reporting features similar to enterprise resource planning (ERP) systems. time2due.com
- **Time2Order – Preorder Management System:** Built a web-based preorder management platform with a soundbox notification system to help local shops manage advance orders, reduce customer waiting time, and control crowd flow during peak hours. Implemented backend logic using Python and SQL and integrated Cashfree Payment API for secure digital payments. Website: time2orders.com | time2orders.shop
- **Time2Farm – Farmer AI Assistant:** Developed a farmer-focused financial management application to track section-wise income, expenses, and profit analysis. Integrated Gemini API to provide AI-driven insights for improving farm financial planning through a simple and mobile-friendly interface. time2farm.com
- **DAKSHAA T26:** Developed a full-stack web application for Dakshaa T26, a national-level technical symposium, to manage the event digitally. Built the frontend using React and created backend services with Express.js and REST APIs. Implemented Supabase for secure database management and user authentication. Integrated with our Collage payment gateway to enable smooth online registration and transactions. Deployed the application on a Cloudflare (Frontend) and VPS server (Backend). dakshaa.ksrct.ac.in
- **TrueSight AI :** Built an AI-powered Deepfake Detection System integrating Roboflow-trained models with a Flask backend for multimodal (video + audio) analysis. Developed evidence structured forensic report generation. Designed an investigation-centric workflow aligned with cybercrime operational needs. Project presented to Namakkal Cyber Cell for potential pilot implementation. <https://tinyurl.com/cybernamakkal>

ADDITIONAL INFORMATION

- | | |
|---|--|
| • Programming Languages: Python, Java, SQL | • Data & Analytics: Power BI, Data Visualization |
| • Web Technologies: HTML, CSS, JavaScript, React.js | • Cloud & Deployment: Cloudflare, VPS Hosting |
| • Backend Development: Flask, Express.js, REST APIs | • Enterprise Concepts: ERP Systems, Business Process Automation, Dashboard Reporting |
| • Database Systems: SQL, Supabase | • Other Skills: Web Hosting, Networking |

ACHIEVEMENT

- Secured 2nd Place in the Namakkal Police Cybersecurity Hackathon 2025 for developing an AI-based cybercrime detection solution.
